## PROFILE

As a Junior Web Developer specialized in backend technologies with proficiency in Node.js and Angular, I bring a solid foundation in SQL and NoSQL databases, alongside expertise in JavaScript and TypeScript. My experience extends to utilizing tools such as Postman and Git for efficient development workflows. Fluent in Spanish and professional level of English, I offer a multicultural perspective, enhancing collaboration within diverse teams. With a passion for technology and a continuous drive for learning, I am committed to delivering high-quality code and providing exceptional support in web development projects. My strong communication skills, coupled with a keen eye for detail, ensure smooth collaboration and successful project outcomes.

## EXPERIENCE

### Database developer whit MySQL:

#### 2022-Currently working

- Create a database for vehicle permits registration.
- Implement markers for data traceability.
- Optimize the management of information that transitioned from paper to a scalable SQL database.
- I am responsible for actively managing and maintaining the department's database.

Initially, I was entrusted with creating and maintaining a comprehensive database for vehicle licensing in the Latin American market. Over time, my responsibilities evolved to encompass overseeing the database's functionality and integrity, ensuring seamless operations for the vehicle licensing department. Additionally, I provided technical support to team members, assisting them with computer technology and internal systems.

### Senior Professional in the Department of Food Safety: — 2014-2024

- Worked as the team lead of the vehicle registration department, with a team under my supervision.
- I was responsible for optimizing the database by implementing a data entry system using PHP and MySQL.
- Provided technical leadership, evaluating if technology meets business requirements.
- Made decisions on what technologies team should be using and implemented plans to put those into place.

- Defined application requirements with business, conducted frequent code reviews, and participated in agile development meetings with team.
- Managed work allocated to other members of the team, monitored progress and evaluated priorities to ensure weekly live product updates are made.
- I have been in charge of the department for four consecutive years, working collaboratively with the leadership team and actively participating in the modification of ordinances and laws.
- In charge of operations in businesses and public areas, overseeing personnel from various departments.

During these years working as the manager of the area responsible for the habilitation of vehicles transporting food, overseeing trained personnel, I developed skills in personnel management and communication.

#### EDUCATION.

- Backend Developer Career – Coderhouse from 3/7/2023 – 2/28/2024
- Angular.js developer – Udemy
- Web developer jr – Hilet institute from 2/2/2022 – 5/30/2022

#### LANGUAGES

- Spanish: Expert
- English: professional
- Italian: Intermediate

#### SKILLS

- HTML
- CSS
- Javascript
- Typescript
- Angular.js
- Node.js
- Bootstrap, Media Queries
- MySQL, MongoDB, SQL
- Express.js
- Git, postman

#### SOFT-SKILLS

- Problem Solving.
- Teamwork.
- Adaptability.
- Leadership Decision Making
- Continuous Learning

#### CLOSING STATEMENT

- With a passion for learning and a commitment to growth, I am eager to embark on my journey as a junior programmer. Despite my limited professional experience, I bring a relentless drive to expand my skills and embrace new programming languages. I am genuinely excited about the opportunity to contribute to innovative projects at Disney Financial Systems and to learn from seasoned professionals in the field. Thank you for considering my application, and I am hopeful for the chance to demonstrate how my dedication to learning and adaptability can align with the needs of your organization.
